Andy, These are copies of the document we developed two months ago. I hesitated to send them to you because we have really worked them over with technical edits and more over the past several months and they are much tighter now. I will share the final version as soon as I can next week. We can provide some of the text we developed on immunotoxicity in our comments on the NTP document we received from you. Also I understand that Joyce also received the NTP document a few days ago for review. We will make sure to coordinate our comments that we send back to OSCP/EPA.

Thanks for the opportunity to review, Betsy

Subject: PFOS and PFOA documents for NIEHS review
Importance: High

Greetings,

Attached above are the internal review drafts of four documents we have developed. The documents PFOA HA 021616 and PFOS HA 02 26 16 are approximately 80 pages and summarize the basis for the HAs. The more detailed Health Effects Support Documents (HESD) for PFOA (PFOA 010816) and PFOS (PFOS 121715) are also provided for the sake of completeness; these are much longer and complex documents.

These documents are still in review internally at EPA and may still change as a result of comments we receive. We are requesting that NIEHS focus on the dose-response sections of the HAs for PFOA and PFOS (section 6.0), including our selection of the critical study and the exposure scenario. We are requesting any comments you may have on that section or other sections of the documents by March 4th.

Please call if you have questions. Many thanks, Betsy
